

Good Morning all, I am standing in for Sue Mclachlan, Animal Magic Art, your local and unique Animal Portrait Artist bringing you stunning animal portraits of your adorable pet at very reasonable prices.

Ranging from watercolours, oils, crayon etchings thro to pastels, charcoal and iPet Portraits too, Sue can replicate from a favourite photo or create from various photos a gorgeous painting or drawing transforming a photo into something live. With attention to detail and realism Sue takes pride in not only exact representation, but also complete customer satisfaction too, giving her clients that lasting memory of their best friend.

Her daughter once told her, when Sue questioned about just replicating a photo, that her paintings look like paintings and not just a photo. When Sue thought about this more she realised that turning her art into a business has made her focus her art practice to the subject and its importance to the viewer and cherishes the moments when a tear comes to the eye of the client when they see the finished painting. Sue has recently joined a new art class last week and is excited to develop her oils to offer a more contemporary feel using colour and texture, but keeping likeness and realism key to the subject.

As Sue has said before, a painting is not only something you hang on the wall it's a memory, a reminder of that cherished friend that will always be with you.

So please keep Sue in mind when you see that doting animal owner.

Thank you. Sue McLachlan, Animal Magic Art.
